Product Description

Add security and strength to your Point of Sale (POS) system while maintaining the iPad Air's sleek, lightweight profile and ease of use with the SecureBack M Series Modular Enclosure with Credit Card Reader for iPad Air. Tablet POS systems are providing a host of opportunities for businesses like restaurants, retail stores, and hospitality outlets. The iPad Air's versatility is perfect for conducting transactions, getting updates on the floor, or offering interactive customer engagement. This new enclosure is ideal in any environment because it elevates service, provides new opportunities for data mining, and allows for mobile payments with Square or PayPal devices.

However, iPad POS systems do have challenges. Kensington addresses the critical issues of security and robustness, while preserving mobility, aesthetics and theft protection. It works seamlessly with the ClickSafe lock (lock sold separately) and wraps your iPad in a strong, low-profile case to guard against bumps and scratches. Built-in cover plates prevent tampering to the power button and volume controls. To prevent clutter, pass-through and enclosed power cord routing options are included. The enclosure is also VESA mountable and compatible with Kensington M Series stands and mobility accessories.

Features

- Preserve iPad aesthetics and mobility while adding security and protection
- Credit Card Reader can be attached through a strategic cutout to facilitate mobile payments
- ClickSafe® enabled, securing in one click with a high-security ClickSafe lock (sold separately)
- Pass-through and enclosed power cord management options
- Cover plates for power button and volume control prevent tampering
- Compatible with VESA (75mm) and M Series mounting/mobility accessories
- Adjustable Kickstand (K67786WW) and Hand/Shoulder Strap (K67832WW) available (sold separately)
- iPad not included
- ClickSafe Combination Laptop Lock, K64677
